

GPS TRACKER USER MANUAL

REFACE

Thank you for purchasing GPS tracker. This manual shows how to operate the device smoothly in details, please make sure to read this manual carefully before using the device. Please be noted that any update of the manual is made without prior notice. Each time the update of the manual will be released in the latest product sales. The manufacturer won't assume any legal responsibility for any errors or omissions made in this manual.

1.Specifications

Content	Specs
Dim.	60*36*17mm
Weight	42g
Network	2G GSM/3G WCDMA
Band	GSM850/900/1800/1900MHz / UMTS850/900/1900/2100MHz
GSM chip	DA6276
GPS chip	Ublox 8030
GPS sensitivity	-159dBm
GPS accuracy	10m
Time To First Fix	Cold status 45s-85s Warm status 35s Hot status 1s
Work voltage	9-36V
Storage Temp.	-40°C to +85°C
Operation Temp.	-20°C to +55°C
Humidity	5%--95% non-condensing

1.1.Led indicator status

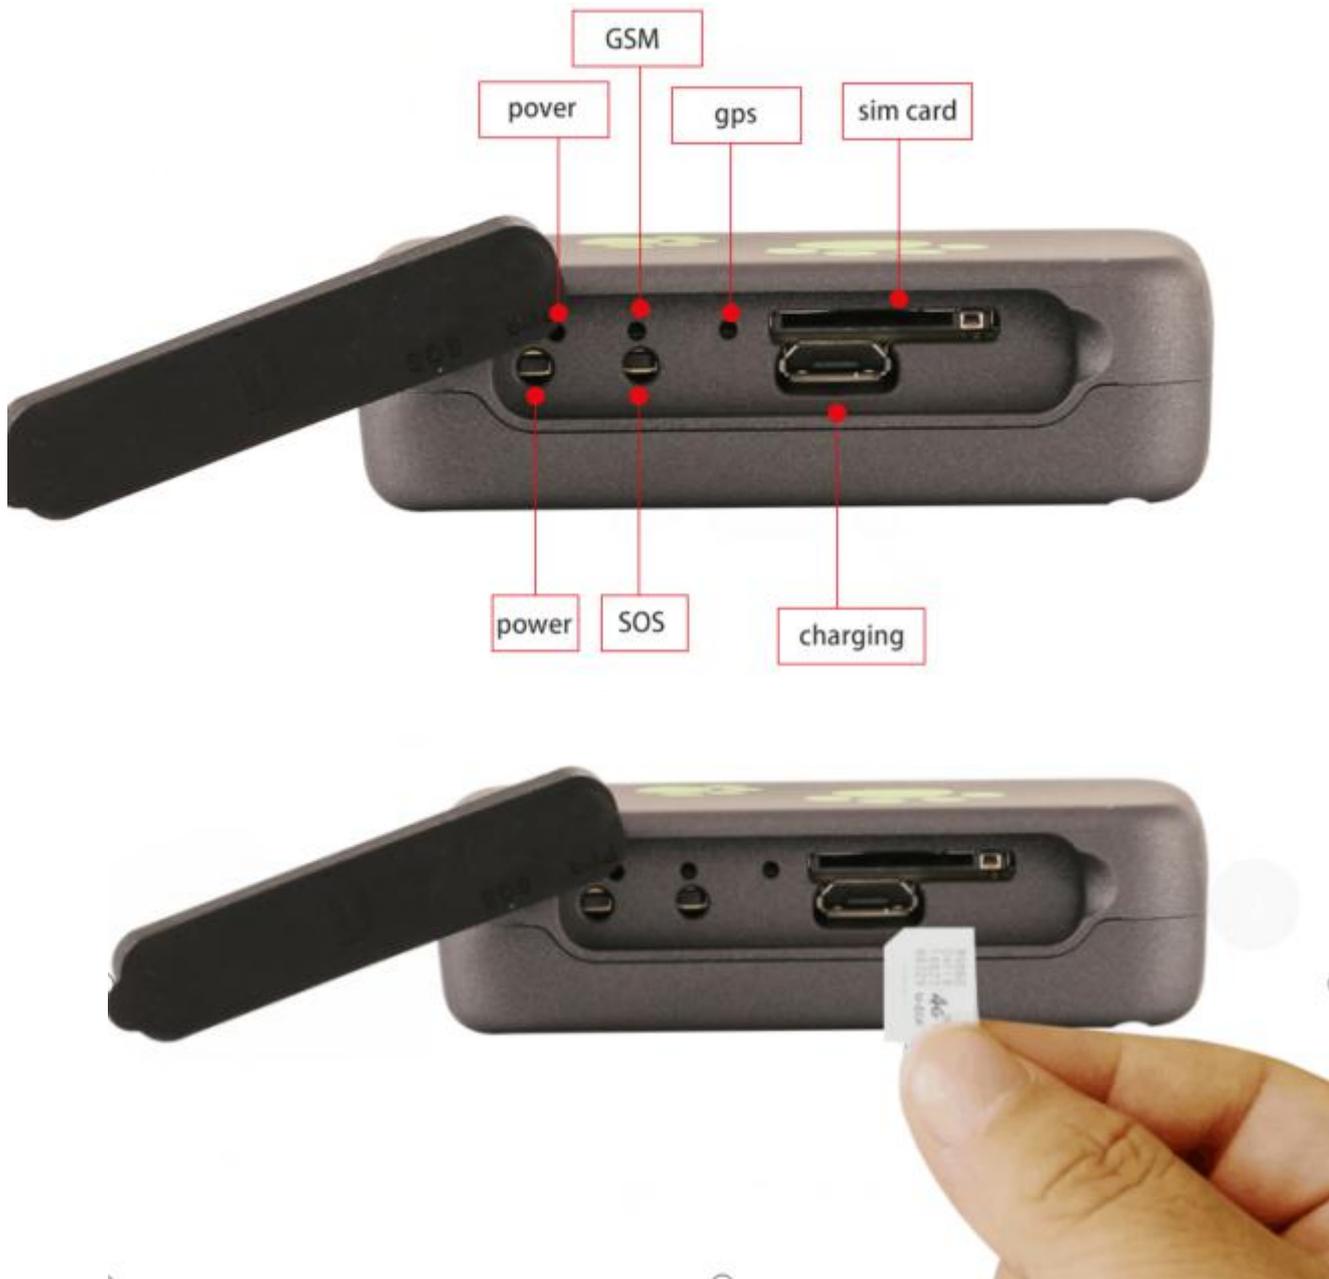

INDICATOR LIGHT STATUS	MEANING
green light -Solid	GSM signal connection
green light -Flash	NO GSM connection
Blue light -Solid	GPS signal connection

Picture (1) With GPS Signal

Picture (2) Without GPS Signal

Pic(1): Replied real-time tracking information

Lat:22.67533 lon:114.03913: Position of the latitude and longitude

- ◆ **Speed: 000.1:** Device moving speed. The unit is km/h.
- ◆ **T:06/14/17 09:14 :** Real-tracking time, the Default is London time. You can Set a time zone by sms command
- ◆ **Google Link:** Google map showing the position of the device.

Pic(2) : Replied last time position information. Now is LBS position information. no GPS signal

- ◆ **smcc:27a4 1223:** Real-time LBS data.
- ◆ **Time:08/00/00** LBS position time.

If you received position message as picture 2, please take GPS tracker to outside till satellite signal searched.

3.Support Website tracking and APP tracking

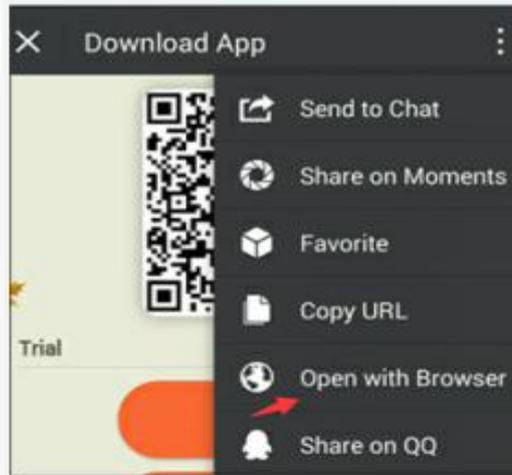

3.1 Scan APP and Download APP

1)Scan QR code---Open with browser--- Choose Android or IPHONE---Download-- Install DAGPS APP

2) Download IOS APP: App Store search ---DAGPS ---Install the APP

Step 1: Scan QR code

Step 2: Open with browser

Step 3: Choose Android or iphone

Step 4: Download

3.2: Login Platform Position

1) Open www.gps110.org

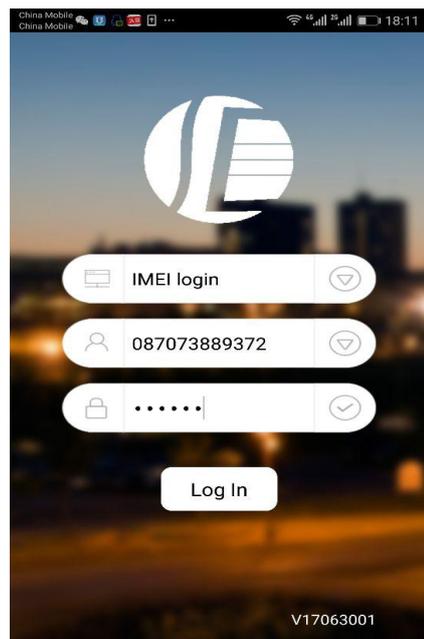

Use tracker ID login, default password 123456.

If you can track the device, it works.

A screenshot of a web browser showing a login form. The form has two tabs: 'User' and 'ID/IMEI'. A red arrow points to the 'ID/IMEI' tab. Below the tabs, there are three input fields: the first contains the number '087073889372', the second contains a masked password '.....', and the third is a checkbox labeled 'Remember'. At the bottom of the form is a large orange button with the Chinese characters '登录' (Login).

PC login

A screenshot of a mobile application login screen. At the top is a logo consisting of a stylized 'E' inside a circle. Below the logo are three input fields: the first is labeled 'IMEI login' and contains a dropdown arrow; the second contains the number '087073889372' and a dropdown arrow; the third contains a masked password '.....' and a dropdown arrow. Below these fields is a white button labeled 'Log In'. At the bottom right corner, the version number 'V17063001' is displayed.

APP login

It is every 1mins/1 times positioning when device is vibrating,you can change positioning time interval

NOTE: If you insert the correct SIM card and open GPS device in outside, the device is still not online. Please set the APN commands

we have two methods to find out APN content: ask SIM card company or insert

SIM card into Mobile phone to find out APN

SMS: APN123456 APN Name

(for example, if the apn name is ABC, so send :apn123456 ABC)

(If have the APN user name and password, need add more APN user name and password behind the APN name)

Eg: APN123456 APN name APN username APN password

If you want use the device on other platform, please send customer service an email with new IP and port. And then send message to SIM card with below format (No need to set by default)

SMS1: adminip123456+space+IP+space+port(No need to set by default)

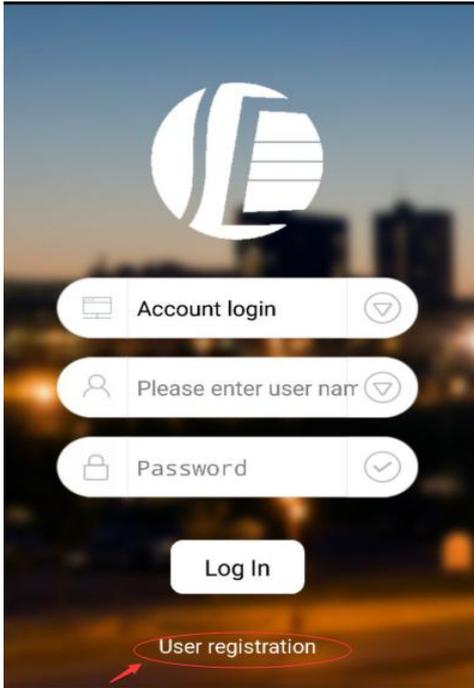

Eg: Adminip123456 103.110.152.62 7018

or SMS1: adminip123456+space+DNS+port(No need to set by default)

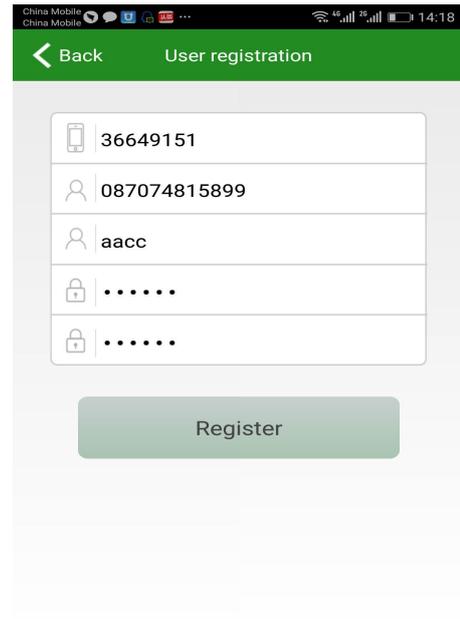

Eg:adminip123456 www.gps110.org 7018

5.3 If need to register Administrator account and tracking multiple devices

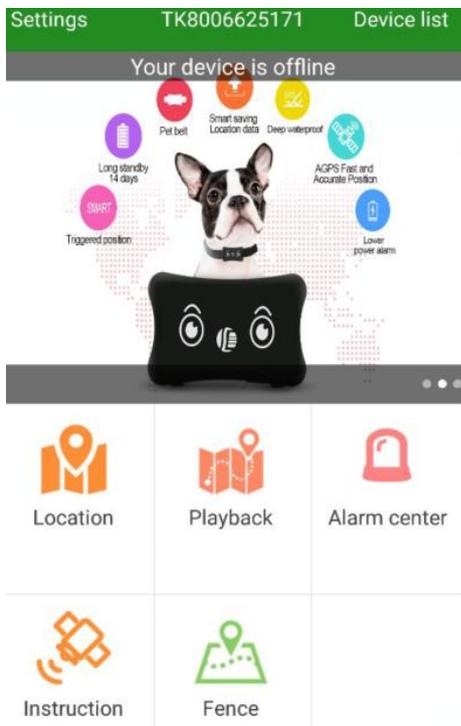

Operation : Click User Registration--- Fill in the APP---Login in Registered Accounts Device List----Add Device---Fill in --OK

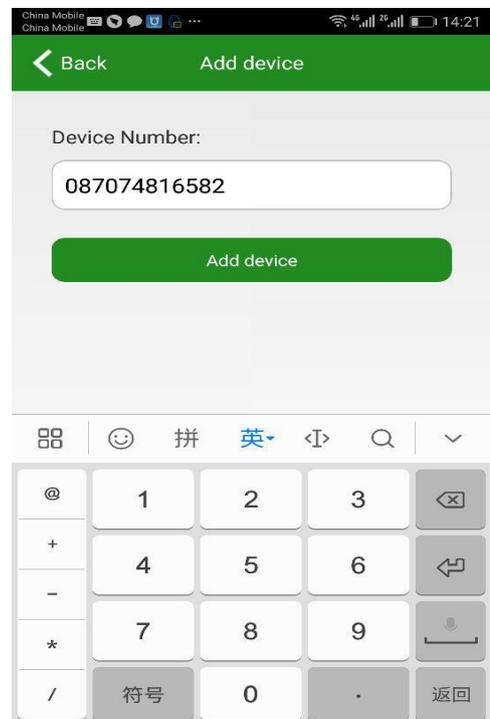

Registration

fill in

Click vehicle list

add device

If you add device more than two, continue to add ID number

3. Working mode

【Mode 1】 : Vibration Power Saving mode (no need set by default)

Send the position data when device is moving and do not send the data when device is static. This mode can save power and save GPRS cost

Use mobile phone send “[static123456 120](#)” to sim card in tracker

It is every 2mins/1 times positioning when device is vibrating

【Mode 2】 : Real-time position, Trajectory mode(urgent mode)

Switch way: [DAGPS APP](#)→ [Click instruction](#) →[Mode switch](#)→[Trajectory mode](#)→[Send](#)→[set upload time\(units is seconds\)](#)

【Mode 3】 : Roll call position, smart power Save mode(Low power consumption)

Switch way: [DAGPS APP](#)→[Click instruction](#)→[Mode switch](#)→[Save power mode](#)

If want to check position, please follows below steps

[Click instruction](#)→ [Position](#)→ [Location](#)

(If you want to locate, you can click locate. If you don't want to track position, device will save power automatically)

【Mode 4】 : SMS mode position (close GPRS)

Switch way: SMS 1: [sms123456](#)

SMS 2: [notn123456](#)

Use mobile phone to call the device and hang up send or “[smslink123456](#)”, you will receive the position

4. Command

NOTE:

- 1) Device default password: `123456` (note the space in the command)
- 2) Use of mobile phone APP or send message to the tracker for all set command
- 3) If you want longer standby time, please don't open move alarm, and real-time location tracking(Trajectory mode). Etc, if open move alarm or trajectory mode, the battery will be used very quickly.
